

Orientation Class - Member Shooting on closed days.

Welcome members to our orientation class for member shooting during off hour times. At the conclusion of this class you will be required to sign a release that you fully understand the importance, responsibilities and safety aspects regarding this privilege.

Current hours for the club are open at 9:00am on Wednesday-Saturday-and Sunday. These days have full staffing to run the club. With this new program for members , you will have the opportunity to utilize the club shooting for trap and sporting clays on all the other days. Monday, Tuesday, Thursday and Friday, with a 9:00 am start time and a closing time of sunset. There will be NO staffing on these off days.

We will now go through all the steps you will be required to adhere to:

First you will have to have targets bought on your pro-matic card. There will be no staffing on off days to provide the opportunity to buy targets. So you need to purchase targets on a regular scheduled open day. The club house will be closed, along with all other out buildings.

Arriving at the drive way you will need to, open the lock and enter thru the green gate. After passing in, close but do NOT lock the gate behind you. You will be provided the combination to the lock. Remember the speed limit in particular the house driveway as there are young children living in the house adjoining the drive way.

Park your vehicle in the parking lot, and proceed to the canopy in front of the club house. Here you will find your sign in and sign out sheet. This is a mandatory requirement, it includes space for number of targets shot. You will also find a maintenance sheet if you have trouble with any of the equipment, and a complaint sheet. Also listed is a list of emergency phone numbers, for fire dept/police/electrical company and ambulance services.

TRAP SHOOTING;

You will now have to operate the traps. For trap shooting the #2 trap house be used for singles and handicap. Trap #4 will be set for doubles. The sporting clays machines are also set up but need for you to turn them on. All turrets will have a full compliments of targets for the start.

Both trap and sporting stations will be fully loaded with targets for your start. You will be required to refill the turrets at the completion of your shooting. This will be a hands on demonstration when we complete this classroom overview.

The trap machines all have a sliding door, protecting the machine and targets from the elements. You simply lift up and set it aside in front of the trap houses. Stand to the west side of the trap house, reach in and turn on BOTH toggle switches. Remove the cone from the roof and place to the side of trap house.

For trap retrieve your empty gun, walk to the pro-matic box insert your card(remember it takes two (50) targets when shooting doubles),. Then walk to number 3 station, turn on the green switch, you will see a RED light when it is operational. You are now ready to begin shooting trap. If you want to shoot handicap, unwind the cords from the speaker stand, to the desired distance.

Reminder-you get 28 targets for the price of 25. One is a show me bird, the other two in case of a broken target. Talking-slamming actions shut, moving speakers can cause unsolicited targets to be released, and your event will come up short of the 25 targets. In the event you shot your 25 called for targets, do not call for the additional targets that could be released.

For sporting clays-pull backward the green covers over the machines. Flip the toggle switches to the on position and your ready to use the control button to release targets , AFTER you insert your pro-matic card.

When you have completed your shooting for the day, your required to refill the machine turrets with targets for the next member who may show up behind you. Again this will be shown with a hands on experience and how to PROPERLY handle the target boxes and individual targets. Return all speakers to the original placement.

After refilling the turrets, release any target with a cocked arm. Turn off all machines in opposite way you turned them on, with toggle switch. Do NOT leave the arms cocked with a target ready to fly. Return the safety cone to the top of the trap house. Reinsert the trap house doors.For sporting clays turn off the toggel switches, close up the green covers on sporting machines.

As always you are expected to either save your empty hulls or throw them in the provided containers. This includes any other debris as you utilize the facility.

After your shooting experience, you now will sign out with time and total targets shot. You can leave a comment about your experience and if you had any problems.

On your departure, when approaching the gate stop short to leave enough room for you to swing the gate open. Drive out--stop and close and LOCK the gate behind you.

Included with this class is a separate listing of the clubs rules for safe gun handling. Please follow these safety rules and if you see another person violating a safety rule be sure to get it corrected, in a non confrontational manner.

This is your club as a member enjoy this opportunity to shoot when your schedule allows.
